PROFESSIONAL EXPERIENCE

Walmart Data Ventures

Chicago, IL · Sep 2024 – Present

Senior Data Analyst

- Built and shipped to production an autonomous Jira ticket-resolution agent that does exactly support-tooling work: 6-gate case triage, MCP-driven context gathering, agentic RAG with FAISS + BM25 retrieval over 11,000 historical SQL queries for knowledge retrieval, and self-healing execution with a 10-retry budget. Closed 400+ data requests across 8 categories over 15 months and cut turnaround from 30–60 minutes per request (up to a full day for complex ones) to under 10 minutes each. Stakeholders never knew an agent was answering them.
- Built a headless KPI monitor on a 6-hour cron that detects threshold breaches, runs root-cause analysis, and posts Slack alerts; decision logs and state persist to BigQuery for end-to-end observability with no LLM-memory reliance. Designed a 3-tier event-driven v2 self-configuring via a BigQuery event registry — new event types ship without code deploys.
- Designed and shipped a self-service analytics agent over 67 BigQuery tables with sub-agent orchestration and human-in-the-loop validation (Context Researcher → SQL Drafter → Validator → Devil's Advocate); 8 deterministic SQL rules and a 23-case golden-query evaluation suite. Approved by Sr. Director and product leadership and the only AI skill in active use by business teams on Data Ventures.
- Replaced ~20 recurring manual workflows with end-to-end automation on a 68-table BigQuery platform; stratified-sampling pipelines recruited 280,000+ panelists across 29 categories with zero duplicates; a recurring 3-hour task now takes ~3 minutes of setup.
- Delivered 5 Power BI dashboards ranked top 1.4% of Walmart's 207,000 dashboards (1,064 views, 22 users); cut data-request turnaround from 1–24 hours to 5–10 minutes; Making a Difference Award.
