PROFESSIONAL EXPERIENCE

Walmart, Supply Chain Engineering	Jun 2021 - Present
Sr. Manager – Symbolic Capabilities Eng.	Oct 2024 - Present
- Developed algorithm that improved 80% of inbound regional DC (RDC) cases' dimensional accuracy compared to item file through statistical aggregation of measurements from field case scanning equipment. - Developed and product managed inbound volume planning web app algorithmically determines trailer contents and loading features to recommend best unload location and labor plan for the shift. Application has 50+ daily users across 25+ RDCs and growing: https://abla.walmart.com/volume-planning/. - Led mixed SKU pallet inbound cell design which will be responsible for receiving ~1.5MM cases/day. - Led partnership with Symbolic Emulation team, routing and tasking efficiency improved by > 15%. - Designed layout for next-generation Symbolic floor load receiving work area to be implemented in 20 RDCs.	
Manager – Symbolic Capabilities Eng.	Feb 2024 – Oct 2024
- Developed Python simulation optimizing case orientation to justify re-orientation automation projected to increase storage density by over 50% for ~25% regional DC inventory, ~2.5MM cases/day. - Owned analytics, strategy, design, and implementation of new pallet inbound cell to be rolled out across 42 ambient regional distribution centers, greater than 12m cases to be processed annually: - o Led justification and design of retrofittable manual inbound cell as stopgap for delays in automated cell development. Currently in 22 building contracts. - o Led design of long-term robotic solution with third-party technology. Signed proof-of-concept cell contract within two months. - Developed MVP store layout to pallet builds sequence labor minimization algorithm which laid groundwork for "intelligent layering" to store workstream.	
Senior Automation Engineer – Ambient Advanced Eng.	April 2023 – Feb 2024
- Led automated depalletizing solutions portfolio worth over \$100MM in yearly labor. Gained capital approval of these pivots, total CapEx ~\$5MM, 15%+ ROI: - o Deployed mixed SKU pallet handling, robotic depalletizing through final acceptance in regional and inbound consolidation networks. - o Implemented the first proprietary, in-house, designed pallet tipping automation in a live DC. Developed sophisticated data collection and analytics identifying bottlenecks and areas of improvement. - Led financial justification, design, SCADA and WMS integrations, third-party engineering, safety risk assessments, budget management, and negotiations/contracting. - Led team of 4 engineers overseeing continuous improvement and automated performance reporting.	
Automation Engineer – Ambient Advanced Eng.	Jun 2021 – April 2023
- Led initial technology/supplier selection, lab test, contracting, and production install for mixed SKU robotic depalletizing; comparative analytics system for technology suppliers, designed and implemented lab test cell and performance tracking, retrofitted and installed robotic depalletizing tech in production improving safety. - Organized and designed mixed SKU palletizing testing; recommended pause until the technology matures. - Onboarded, managed, and guided summer '21 intern through two projects and a full-time offer/transition.	
Intern – Ecommerce Emerging Tech	May 2020 – Aug 2020
EDUCATION	
Kansas State University	Aug 2017 – May 2021
B.S. Industrial Engineering; Minors: Statistics, Business (London School of Economics) - 3.7 GPA	
SKILLS	
Automation/PM: Led operations, safety, legal, finance, developers, engineering, procurement, technicians.	
Technical: Python, SQL, Outlook, GCP BigQuery, Excel, linear programming, statistical analysis, AutoCAD.	
Financial Modeling: Labor savings, depreciation, reinvestment, transportation, safety/ergonomics factors.	
Professional Training: Karms Effective Negotiation, SWRI ROS II (Robot Operating System).

EDUCATION

Kansas State University Aug 2017 – May 2021
B.S. Industrial Manufacturing Systems Engineering - 3.7 GPA, Putnam Scholarship Recipient
Minors: Statistics, Business (London School of Economics)

PROFESSIONAL EXPERIENCE

Walmart, Supply Chain Engineering Jun 2021 - Present

Senior Automation Engineer/Manager - Symbolic Capabilities Eng. Feb 2024 – Oct 2025

- Responsible for analytics, strategy, design, and implementation of new pallet inbound cell to be rolled out across 42 ambient regional distribution centers. > 1bn cases processed annually;
 - Led justification and design of retrofitable manual inbound cell as stop gap for delays in automated cell development. Currently in 3 building contracts.
 - Led design of long-term robotic solution with 3rd party technology. Signed proof of concept cell contract within 2 months.
- Developed Python simulation optimizing case orientation to justify general case induct automation modifications projected to increase storage density >50% for >25% of total ambient cases.

Senior Automation Engineer/Manager - Ambient Advanced Eng. April 2023 – Feb 2024

- Led automated depalletizing portfolio worth over \$100MM in yearly labor:
 - Successfully led pilot and proof of concept deployments of mixed SKU robotic depalletizing with 3rd party technology through final acceptance.
 - Successfully led first implementation of proprietary Walmart MHE in live DC. Developed sophisticated data collection and analytics identifying key areas of improvement for the next generation of the technology.
 - Spearheaded capital approval of these projects, total CapEx: ~\$4.5MM, IRR > 15%.
- Led financial justification, design, SCADA and WMS integrations, 3rd party engineering, safety risk assessments, budget management, and negotiations/contracting.
- Led team of engineers overseeing continuous improvement and automated performance reporting of installed cells.

Automation Engineer - Ambient Advanced Eng. Jun 2021 – April 2023

- Led initial technology/supplier selection, lab test, contracting, and production install for mixed SKU robotic depalletizing:
 - Developed & implemented comparative analysis system for technology suppliers.
 - Designed and implemented lab test cell and performance tracking.
 - Retrofit & installed robotic depalletizing tech in production improving safety.
- Completed mixed SKU palletizing testing; recommendation program halt for tech development.
- Directly managed and converted summer '21 intern to full time associate.

Intern - E-commerce Emerging Tech May 2020 – Aug 2020

SKILLS

Automation PM: Led operations, safety, legal, finance, developers, engineering, procurement, technicians.

Technical: Python, SQL, Databricks, GCP BigQuery, Excel, linear programming, statistical analysis, AutoCAD

Financial Modeling: Directly justified \$10MM+ in CapEx: labor savings, depreciation, reinvestment.

Speaking: Led recruitment seminar K-State, UArk DC tour; Presenter: Share N' Learn, Meet the Vendor

Professional Training: Kansas Effective Negotiation, SMRI ROS (Robot Operating System)

[Supply Chain Automation and Project Management](#)

[Senior Automation Engineer](#)

[May 2023 - Feb 2024 · 10 mos](#)

[Bentonville, Arkansas, United States · On-site](#)

Successfully led the automated depalletizing portfolio: successful pilot and proof of concept deployments of two novel depal cells. My role involved managing diverse teams of engineers, operators, and skilled technicians, both internal and external, through the stages of design, approval, implementation, and acceptance.

These projects incorporated innovative SCADA and WMS integrations, 3rd party engineering development, and challenging inter-company contracting. Through the development of these programs I was able to work on/with proprietary technologies, advanced analytics including regression and LP modelling, autonomous guided vehicles, six-axis robotic arms, computer vision, and control of conveyance systems. Many of these technologies/tools are used daily by operations and engineering teams within Walmart's supply chain.

Furthermore, I spearheaded the capital approval and business justification of these projects. As a result these technologies are now being rolled out across Walmart's supply chain, including an international deployment.

Skills

- Financial Analysis (Excel Solver, DataAnalysis)
- Data Analysis (BigQuery, Dataliku, General SQL)
- Project/Program Management (Airtable SME)
- Python (Pandas, NumPy, OpenPyxl, SimPy)
- CAD Software (Solidworks Assoc.)
- Legal Agreements (SCAs, MHMAs, NDAs)

Experience

06/21 - PRESENT

Automation Engineer / Walmart Bentonville, USA

- Robotic Depalletization:** Led a team to deliver a program worth \$100+MM yearly labor spend through all phases of development process in 1.5 years: technology discovery, market evaluation, vendor recommendation, lab testing, reporting, contracting, cell design, production pilot, financial justification, and now system rollout.
- Robotic Palletization:** Led technology discovery and external vendor evaluation effort entailing building/onboarding vendors, testing technology, defining use cases, and creating project proposals for grocery and ambient networks.
- Trailer Load/Unload Automation Strategy:** Led data collection and financial analysis to underly the proposed trailer loading and unloading automation workstream; resulting in handoff to senior project manager.
- Intern Management:** Successfully managed summer intern through challenging projects in data analytics, process improvement, and scripting; resulted in full time conversion.
- Data Analytics:** Created teams foundational knowledge base of next generational data processing tools in GCP BigQuery and Dataliku.
- Project Management Automation:** Determined team need for better project management tool. Evaluated market and recommended Airtable. Facilitated adoption and created project management architecture and automated reporting.

05/20 - 08/20

Emerging Technology Intern / Walmart Bentonville, USA

- Managed \$200K project to decommission and reinstall robotic depalletizing lab cell.
- Onboarded, managed, collected data, and wrote test plan for external automation supplier.

Education

2017-2021

B.S. Industrial Engineer: 3.7 GPA / Kansas State University

- Minors: Business and Statistics
- London School of Economics Summer 2019
- Purnan Scholarship Recipient: 33 ACT, Maintain 3.5 GPA
- Other Involvement: Engineers without Borders, Engineering Ambassadors, Phi Delta Theta

Resume04_2023.pdf

Supply Chain Automation and Project Management

Ecommerce Emerging Technology Intern

Walmart · Internship

May 2020 - Aug 2020 · 4 mos

Bentonville, Arkansas, United States

I had the privilege to work with Walmart's Supply Chain Engineering Emerging Technologies team. Through my three projects, I managed three leading automation vendors and worked cross functionally within the Walmart environment to coordinate their successful completion/handoff. Each project worked in a different part of the life cycle of the emerging technology team: creating an initial business case for humanoid robotics technology, contracting and designing a proof of technology for computer vision/human in the loop system, and redesign & relocate an autonomous mixed SKU depalletization cell. Through these projects I honed my project management, leadership, analytical, design, and communication skills.

Concrete Finisher

CONCRETE CONCEPTS, INC. · Full-time

May 2018 - Aug 2018 · 4 mos

Kansas City Metropolitan Area

Worked at a residential flat work concrete company: tearing up, framing, pouring, and finishing concrete in varied worksites/settings. I learned to work to finish the job, in challenging physical conditions, through language barriers and the importance of self reliance when handling novel problems. This job set the foundation for my work ethic.

Internship Experience

Walmart Supply Chain Engineering - Emerging Technology

Summer 2020

- Managed three distinct projects and automation vendors while completing analysis, design, contracting, and installation of mixed SKU depalletization technology
- Led work flows externally and cross functionally with vendors, engineering, operations, and legal teams

Campus Involvement

Engineering Ambassadors

Spring 2019 - Present

- Represent the College of Engineering to potential students during weekly office hour and tours
- Completed E-Lead Leadership Program

Phi Delta Theta Fraternity

Fall 2017 - Present

- VP of New Member Development** - Responsible for planning and executing the development of 30 new members: scholarship, philanthropy, culture, and projects
- Executive Social Chair** - Responsible for managing \$30,000 budget, organizing roughly 30 social events, including 4 major events, for a 110 man chapter

Engineers Without Borders

Fall 2018 - Fall 2019

- Performed cost analysis of Guatemalan retaining wall project in Revit
- Attend weekly meetings and communicate with engineering professionals for projects

Institute of Industrial Engineers

Fall 2018 - Present

- Attend the professional society's meetings and events

Industrial Engineering Skill Accelerator Program

Fall 2017

- Founding member - now is a course offered by K-State Engineering
- Founded to help undergraduates identify and improve tangible skills for professional life

Work Experience

Concrete Concepts

Summer 2018

- Worked up from laborer to novice concrete finisher
- Bilingual communication used daily

Study Abroad

London School of Economics

Summer 2019

- Rigorous coursework in Accounting and Consumer Behavior and Marketing
- Expanded worldview and cultural understanding

Awards

Putnam Scholarship

Fall 2017-Present

- 33 ACT, Maintain a 3.5 GPA

Phi Delta Theta

Scholarship

2017-Present

- Outstanding Academics

Skills

Solidworks Certified

Fall 2018

- Passed Associates Exam

Python

Fall 2018

- Individual study and one class in language

Updated August 2020

The London School of Economics and Political Science (LSE)

Study Abroad, Accounting and Consumer Behavior

2019 – 2019

Privileged to be able to travel and pursue my business minor at the London School of Economics during the summer of 2019. Focusing specifically on Consumer Behavior and & Accounting.
