Regular/Permanent

Salaried

Position Summary...

What you'll do...

Job location: Bentonville, AR

Walmart is transforming the way we solve business problems and launching Walmart's first "biz/tech" role. We're enabling a future where a single person can own, design, and deploy powerful AI-driven agents that get work done—without needing a team or technical background. We are looking for **Agent Builders**—problem solvers who are passionate about speed, simplification, and impact. As an Agent Builder, you'll leverage our self-service agent building tools—featuring low-code/no-code interfaces and natural language chat interfaces—to design and deploy agents that automate complex workflows across Walmart. You'll be solving big problems end-to-end, enabling rapid iteration, and making processes dramatically more efficient. The role is ideal for self-starters who think holistically, simplify fearlessly, and execute with urgency.

What You'll Do

- Use a low-code/no-code agent-building platform to build and deploy software agents that solve complex business problems.

- Translate business challenges into agent-driven automation by chaining together APIs, triggers, LLM functions, and data workflows.
- Rapidly iterate on agent design using natural language interfaces and workflow visualizers.
- Own solutions from start to finish—no handoffs, no dependencies—just results.
- Partner with cross-functional teams to understand upstream and downstream implications of automation.
- Continuously improve agent performance by monitoring execution and applying first-principles thinking to optimize or re-architect as needed.
- Be a champion of change—challenge legacy thinking, push boundaries, and drive action.
- Act as a force multiplier by enabling other business stakeholders to think in terms of agents and automation.
- Your success will be measured by sales growth, cost savings, and time savings, not the number of agents you build.

Who You Are

- A generalist who loves solving problems end-to-end.
- Biased for action—you build before you book meetings.
- Comfortable with ambiguity and energized by new challenges.
- Obsessed with speed, simplification, and tangible outcomes.
- Not afraid to ask “why,” challenge orthodoxy, or break the mold.

Basic Qualifications

- 5+ years of experience in a business, operations, product, strategy, or generalist role with proven track record of results.
- Familiarity with basic technical concepts (APIs, microservices, LLMs, triggers, webhooks, etc.).
- Strong analytical skills with a systems-thinking mindset.
- Excellent written and verbal communication skills.

- Ability to think independently and simplify complex problems using first principles.

Preferred Qualifications

- Experience with AI/LLM applications, prompt engineering, or automation tools.
- Understanding of retail, ecommerce, supply chain, merchandising, or logistics operations.
- Prior experience in a fast-moving, high-growth environment.

At Walmart, we offer competitive pay as well as performance-based bonus awards and other great benefits for a happier mind, body, and wallet. Health benefits include medical, vision and dental coverage. Financial benefits include 401(k), stock purchase and company-paid life insurance. Paid time off benefits include PTO (including sick leave), parental leave, family care leave, bereavement, jury duty, and voting. Other benefits include short-term and long-term disability, company discounts, Military Leave Pay, adoption and surrogacy expense reimbursement, and more. You will also receive PTO and/or PPTO that can be used for vacation, sick leave, holidays, or other purposes. The amount you receive depends on your job classification and length of employment. It will meet or exceed the requirements of paid sick leave laws, where applicable. For information about PTO, see <https://one.walmart.com/notices>. Live Better U is a Walmart-paid education benefit program for full-time and part-time associates in Walmart and Sam's Club facilities. Programs range from high school completion to bachelor's degrees, including English Language Learning and short-form certificates. Tuition, books, and fees are completely paid for by Walmart. Eligibility requirements apply to some benefits and may depend on your job classification and length of employment. Benefits are subject to change and may be subject to a specific plan or program terms. For information about benefits and eligibility, see [One.Walmart](#).

The annual salary range for this position is \$110,000.00 - \$220,000.00
Additional compensation includes annual or quarterly performance bonuses.
Additional compensation for certain positions may also include :
- Stock

Minimum Qualifications...

Outlined below are the required minimum qualifications for this position. If none are listed, there are no minimum qualifications.

Option 1: Bachelor's degree in computer science, computer engineering, computer information systems, software engineering, or related area and 5 years' experience in software engineering or related area.

Option 2: 7 years' experience in software engineering or related area.

Preferred Qualifications...

Outlined below are the optional preferred qualifications for this position. If none are listed, there are no preferred qualifications.

Master's degree in computer science, computer engineering, computer information systems, software engineering, or related area and 3 years' experience in software engineering or related area., We value candidates with a background in creating inclusive digital experiences, demonstrating knowledge in implementing Web Content Accessibility Guidelines (WCAG) 2.2 AA standards, assistive technologies, and integrating digital accessibility seamlessly.
